Why Innovation Matters

Why Innovation Matters

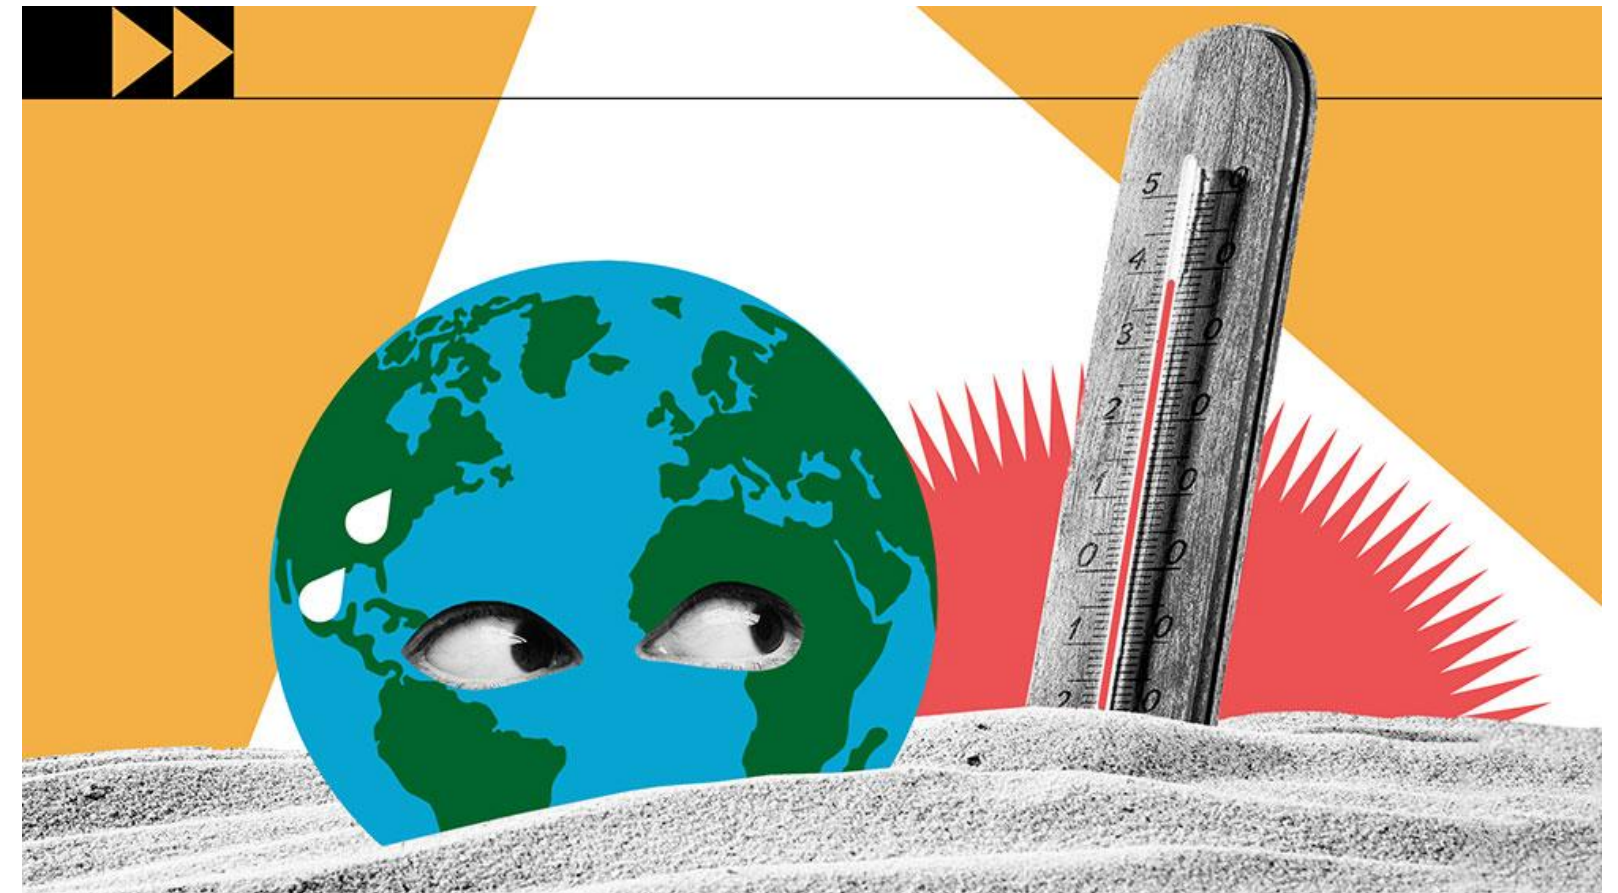

Think about this:

- What happens if we keep using resources the same way?
- Why do we need new ideas to solve environmental problems?

Our World Today

- Climate change is increasing
 - Resources are becoming limited
 - Pollution and waste are growing
- 👉 The way we live today is not sustainable

Why We Need Innovation

Old solutions are not enough

👉 We need:

- new ideas
- better solutions
- different ways of thinking

Small Actions Matter

Turning off lights when they are not needed, reducing plastic use, choosing to walk or cycle instead of using a car, and saving water are all simple everyday actions that can help protect the environment. Even though these actions may seem small, they can make a significant difference when practiced consistently and collectively.

Remember!

Small action × **many** people = **BIG** impact

You are the change!

You are not just students, but future innovators, problem-solvers, and change-makers. Your ideas and actions have the power to shape a more sustainable world.

You are the change!

Remember that **innovation** is not only about technology; it is also about **thinking differently** and approaching challenges with **creativity** and new perspectives.

Thank you!
