Thinking About the Future

This part of the lesson invites you to think about the future and your role in shaping it. Consider the following questions:

- What kind of world would you like to live in?
- What inventions could help protect the planet?

Why These Questions Matter

Many sustainable solutions already exist today. However, they are not enough to solve all environmental problems.

Some challenges still remain, which means new ideas and innovations are needed.

Your perspective is important in shaping a better future.

The Need for Innovation

The future depends on ideas that have not yet been created. Progress requires:

- new ways of thinking
- creativity
- willingness to explore new possibilities

Innovation helps us respond to environmental challenges.

Imagining Beyond Today

You are encouraged to think beyond what exists today.
This means combining scientific knowledge with
creativity and imagining solutions that may not yet exist.
Even ideas that seem unrealistic now can become
possible in the future.

Today's imagination can become tomorrow's innovation!

Thank you!
